

# Preventive Care

**Many SelectHealth® plans cover preventive care at 100%—that means no copay, coinsurance, or deductible.\***

Preventive care is covered 100%—but the key is in the codes. Medical codes are used to explain what service or procedure you received. For services to be covered as preventive, your doctor must bill your claims with preventive codes. If the preventive service finds a condition that needs further testing or treatment, you will need to pay regular copays, coinsurance, or deductibles. Certain categories may have different frequency recommendations for the services available. **Remember, not every test within a specific category or service is considered preventive.** Questions? We're happy to explain how this benefit works and how often these services are considered preventive! Call Member Services at **800-538-5038**.
