Viewing Provider/Facility Network Status

Instructions for Accessing Provider/Facility Network Status

For providers with multiple locations, CareAffiliate users need to select the location considered in-network to avoid a possible out-of-network denial. Now you can view the network status. This new functionality also helps identify incorrect information so that it can be solved earlier in the process. Follow these instructions for accessing this information:

- 1 Select the search option in the **Requesting Provider/Facility** field (if a clinician) or the **Place of Service -- Facility** field (if a facility).

General Information

Member ID: 0645008252
