\*CPT II codes can be used in the procedure code field for reporting purposes only to describe clinical components without a billable charge amount. Typically, these are measured during an annual HEDIS audit and require chart retrieval from offices. These code options for reporting completion of these services is an alternative option to ease the administrative burden of chart review. All of these codes are billable with AWV codes **G0402, G0438, or G0439**.
