Comparison Page:

Once you click on an individual measure rating, you are re-directed to this drill-down page. This page is an interactive comparison to peers and allows you to drill down by city if desired. It also allows you to select different metrics to see the drill down on other individual measures indicated in blue. The grid on this page shows a comparison to peers of how many unique patients each provider has, their success rate, and their current ribbon score for the selected measure. It breaks these scores down to show the trend month by month for 6 months back. The providers in the grid are ranked by who has a current ribbon rate of 5 down to those with a

Patient Data Page:

On this page, you can view the patient list of screened (compliant/colored blue) vs. Not Screened (non-compliant/colored orange) that were used to calculate your rate. This list of patients indicates the date they were screened, last filled their medication, etc. If their screening has expired from the recommended timeframe or if they have never been screened at all it will show an orange date, “Outdated or None” in orange, or sometimes it might just be blank. Please note that the purpose of this tab is to show you how your score was calculated. We would ask that if you participate in a SelectHealth program that already provides you with a report of members to improve rates, then to

please use your current SelectHealth reports to work and improve your scores (Quality Provider Payment Program, etc.). However, if you do not currently participate in a program that provides this then you are welcome to utilize this list to do so. To export this list to an excel file simply select the  Download download button at the bottom right or top right of the screen. “Crosstab” is the selection that will give you an excel spreadsheet. Make sure to choose the sheet “Patients” when prompted. To return to the previous screen click the left facing green arrow.
