

# Provider Dashboard Reference guide

## Landing page View

1. Average patient demographics
2. Actionable clinic metrics
  - a. Annual wellness completion rate
  - b. Verification Rate
  - c. Assessed Hierarchical condition codes (HCC) per member
3. Risk Adjustment Factor (RAF)
  - a. RAF score breakdown
4. Highest opportunity patients
5. Top 10 Suspected conditions

# Clinic Metrics Defined

## Completed Annual Wellness Visit/Preventive

Number of visits completed/total number of patients

## Current Assessment Rate/Verification Rate

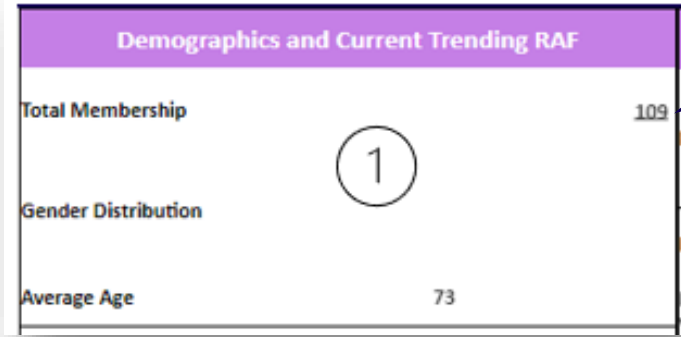

Conditions coded/Previously coded conditions

## HCCs per member

Average number of Hierarchical Condition Categories

Members w Completed AWV/Preventative Visit	2,316	#
Current Assessment / Verification Rate	67.9%	2
Assessed HCCs per Member	1.80	

# Patient view

Opening any membership links for a more detailed view of the selected patient population

- Plan ID
- Demographics
- High risk flag
- Trending Raf
- Most recent AWW
- HCCs

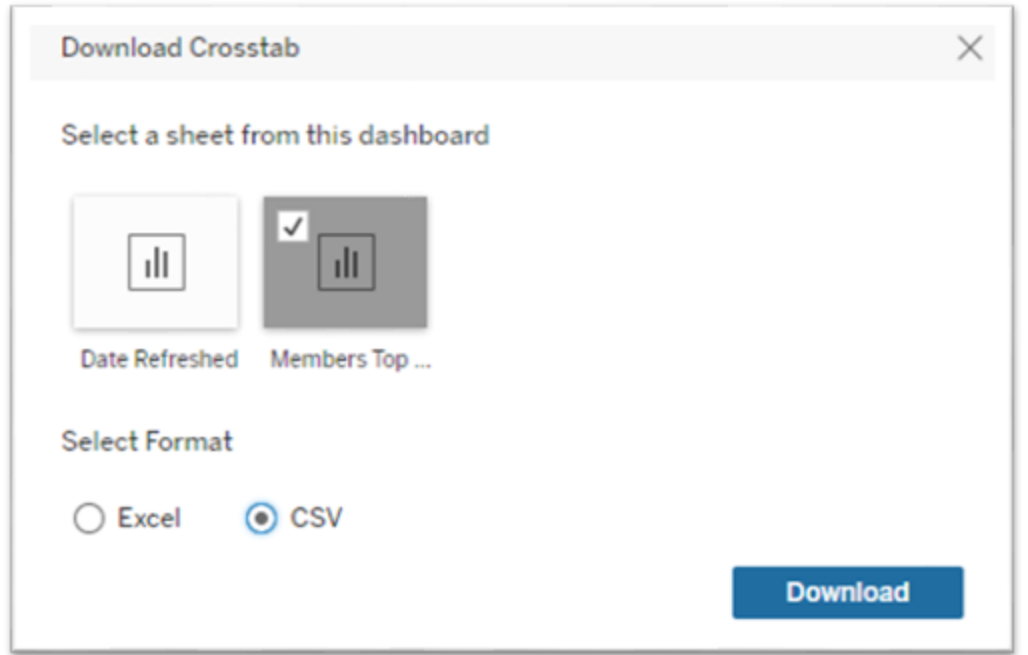

And more

Total Membership		Data Updated		#####		<a href="#">&lt; Back to Dashboard</a>						
Plan	Member ID	Full Name	Date of Birth	Gender	High Risk Member Flag	Current Trending RAF	Most Recent AWW/PV	Most Recent E&M Visit	Most Recent Hospital/ER Visit	HCC Hierarchy	HCC	Hcc Description

# Download full detail reports

- Select download (pictured right)
- Choose Crosstab
- Members Top...
- CSV

*Note: The downloaded report will give another level of patient detail beyond the expanded view*

# Strategy

Using your data to maximize effectiveness

# Performance Metrics

*RAF Scores are provided for informational purposes. Increased RAF will result from improved patient engagement*

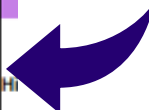

## Target Rates

- Annual Wellness visit/ Comprehensive care visit rates
  - 75% of High opportunity members: Commercial
  - 75% of all members: Medicare
- Assessment/ Verification Rate 75% of previously coded conditions

# Patient detail

From any of the links providers can view a partial expanded view or download full detailed reports for their panel

Demographics and Current Trending RAF		
Total Membership	109	Hi
Gender Distribution		M
Average Age	73	M Vi

High Risk Member Engagement Opportunity		
Highest Opportunity Membership	63	

## Expanded view

Open any of the membership links to view member specific details including:

Available fields in expanded view include:

- Demographic
- High-risk flag
- Current Trending RAF
- Date of AWV/PV
- Most recent E/M visit
- Most recent hospital stay
- HCC Hierarchy
- HCC description
- Chronic vs Acute
- Condition Assessment status
- Servicing provider
- Servicing Clinic

## High Risk Member Engagement Opportunity

Highest Opportunity Membership

164

Members without an E&M Visit

275

9

Members without AWW / Preventative Visit

960

284

Members with No Conditions Documented

1,470

## High Risk Member Engagement Opportunity

Open any of population links above to view specific details OR download into an excel spreadsheet

- High Opportunity members: Open conditions that need to be verified and coded in the current calendar year
- Members without an E/M visit in red will identify patients with a hospital visit and no follow-up PCP care

# Important notes:

- Select Health updates the data behind the reports monthly. Clinics will see a refresh by the beginning of each month.
- Supporting data is based on historical claims data. If your records show conditions have been reassessed, or a visit completed there is no need to take immediate action.
- There may be fewer members represented in our dashboard than what a clinic shows in their records
  - Not all commercial members are tracked for Risk Adjustment purposes.
  - Patients who have not been seen recently may not have an attributed relationship. This will change as they engage with your clinic for healthcare needs.
