

The IllumiCare Gaps Tool: Easily Identify Care and Coding Gaps

With Select Health's free IllumiCare Gaps tool, you can quickly check Select Health patients for care or HCC coding gaps.

Illumicare will:

- Indicate what specific gaps exist for each patient and what conditions need to be addressed
- Seamlessly check and update when viewing a patient in any electronic medical record (EMR)
- Not exchange data between EMR and Select Health
- Fully support users with no additional IT resources needed
- Take less than 20 minutes to install at no cost to you
