Quality Provider Program — Endocrinology

Working Your Open Gaps List: Diabetes Care, Kidney Health Evaluation (KED)

Instructions

STEP 1

Create a current gaps-in-care list:

- 1. Open your "Gaps in Care for Download" report: **<u>OPP Report Hub</u>**
- 2. Apply these filters:
 - **Super clinic**: Choose your clinic.
 - Measure: Click on "Diabetes Care: Kidney Health Evaluation (KED)"
 - **Status:** Unclick the Compliant box. This will filter for only the achievable members.
- 3. In the dropdown menu on the top right side of the page, change the view from **"Member"** to **"Download."**
- 4. Follow the instructions on the screen to export the data to Excel.

Refer to Report Hub Instructions: Basic User.

STEP 2

Format your Excel export. (See <u>Formatting a Gaps List in Excel</u>.)

STEP 3

Review "Tips for Working your Gaps-in-Care List" (beginning on **page 2**).

NOTE: Examples used in this document are for instructional purposes only; the dates that appear are only representative of what a user might see. Please make sure to enter correct dates for the current measurement year when working your gaps list.

Measure Information

The American Diabetes Association (ADA) and the National Kidney Foundation (NKF) recommend screening patients with diabetes for kidney disease every year using estimated Glomerular Filtration Rate (eGFR) and urine Albumin-to-Creatinine Ratio (uACR).¹²

- eGFR Assesses kidney function (blood test)
- uACR Assesses kidney damage (urine test)

For this measure:

- The beginning of the calendar year is the measurement start date.
- The end of the calendar year becomes the measurement end date. Your gaps-in-care list has the measurement end date noted in the Measure Instructions column.

				Completed elements:		
48	Diabetes Care: Kidney Health Eval (KED)	1/29/2024	Achievable	(DT:05/16/24 TYP:EGFR SRC:P)		Member needs Kidney Health Evaluation by 12/31/2024.
49	Diabetes Care: Kidney Health Eval (KED)	9/18/2023	Achievable	To Be Completed		Member needs Kidney Health Evaluation by 12/31/2024.
50	Diabetes Care: Kidney Health Eval (KED)	3/12/2024	Achievable	To Be Completed		Member needs Kidney Health Evaluation by 12/31/2024.
C 1	Disbates Care: Kidney Health Eval (KED)	11/24/2022	Achievable	To Be Completed		Member people Kidney Health Evaluation by 9/21/2024

• Any testing completed before or after the measurement year will NOT count as compliance for this measure.

If your team hasn't already done so, please implement these best practices:

- Make sure the correct labs are built into your provider order sets.
 - eGFR billing codes: 80047, 80048, 80050, 80053, 80069, 82565
 - uACR billing codes: 82043, 82570
- Designate staff to scrub charts prior to the visit and send notes/messages to the medical assistant/ provider about which labs are needed.

Tips for Working Your Gaps-in-Care List begin on page 2...

Primary Care: Working the Open Gaps List for Diabetes Care, Continued

Fips for Working your Gaps in Care List	Μ
1. Learn how to decode the information in the status detail column.	Status Detail 🗸 🗸
• DT = The date the test was done	Completed elements:
• TYP = The type of test that was done	
— EGFR — estimated glomerular filtration rate	
— UCR — urine creatinine	D1:01/29/24 YP:UACR SRC:S
— QUA — quantitative albumin	DT:01/29/24 TYP:UCRSRC:S
 UACR — urine albumin-to-creatinine ratio 	DT:04/09/24 TYP:EGER SRC:P
SRC = The source from where we received the information	

- P = Primary (claims)
- S = Supplemental (lab feed, data submission, direct EMR access etc.)
- 2. If the patient has not had any testing, please schedule their kidney evaluation before the end of the measurement year.
- **3.** Albumin is the most frequently overlooked kidney health test. To get the ratio of albumin to creatinine, it is ideal to use the same urine sample.
 - If the patient has only the creatinine done, then the urine albumin and creatinine will need to be redone at the same time.
 - In the example at right, the eGFR and creatinine were done, but without the albumin. In this situation, you should schedule the patient to have his uACR done.

Status	, T	Status Detail	
Achievable		To Be Completed

Corrections Pro Tip

Please wait 6 weeks from the date of service before determining if a correction is needed. This allows time for claims to be processed, ultimately saving us all time by submitting only corrections that really may be needed.

Diabetes Care: Kidney Health Evaluation (KED), Continued

- **4.** As you scrub your charts, you might be surprised to find labs that were completed, but Select Health has not received the claim. In this situation, you may submit these labs as corrections by:
 - Accessing the Quality Data Corrections (QDC) Tool
 - Using the link(s) provided in the downloaded Gaps-in-Care Excel file to have member and measure information pre-populated
