

Drugs with Special Requirements: Using the Look-up Tool

Follow the steps below to find drugs with special requirement benefits for each type of coverage and submit online preauthorization requests.

1. Open [Drugs with Special Requirements](#) look-up tool.
2. **Select the drug list relevant to your patient's coverage.** For more information about these coverage types, access these links.

3. Once the relevant drug list appears, **look up the drug** by either typing in the name or going to the relevant area of the A-Z index.

4. Based on the special requirement benefit information in the third column, **start a preauthorization request by clicking on one of these 2 links.**

RxSelect Plans - Drugs with Special Requirements

Some drugs have special requirements that must be met before SelectHealth will cover them.

- **Step therapy** drugs require your provider to first prescribe alternative options that are generally more cost effective without compromising quality. Step therapy may be waived if determined to be medically necessary.
- **Preauthorization** is required for certain drugs. This process must be completed by your doctor before you fill your prescription.

If your physician believes that you require a certain medication that is not on your formulary, normally requires step therapy, or exceeds a quantity limit, he or she may request an exception through the preauthorization process.
